EXPERIENCE

Faateh Real Estate, Dubai — *Business Data & Finance Analyst*

March 2024 - Present: FTE

- Delivered real-time variance analysis dashboards using Power BI, enabling leadership to identify cost-saving opportunities of 100% in operational budgets.
- Maintained accurate financial reporting across all business units, assisted in monthly forecasting processes, and performed comprehensive bank reconciliation.
- Developed automated scripts to streamline bank reconciliations and monthly forecasting, saving the finance team 20 hours per week.
- Led the end-to-end migration of legacy financial data to a firm-wide Frappe/ERPNext system, ensuring 100% data integrity and reducing cross-departmental reporting lag by 50%.

Deloitte, Kolkata – SA&MA Analyst

July 2023 - October 2023 - Internship

- Utilised Python and PowerBI to synthesise complex datasets into actionable insights for the consulting director, directly informing strategic recommendations for clients.

NUS, Singapore – Data Analytics Using Deep Learning

June 2023 - Internship

- Collaborated with industry experts and faculty at NUS to engineer a practical solution for the education industry.
- Conducted comprehensive data preprocessing and feature engineering, ensuring high-fidelity inputs for deep learning architectures.

ZAK Venture Pvt Ltd, Noida — *Data Analyst*

July 2022 - January 2023 - Internship

- Assist in collecting, cleaning, and organising large datasets for analysis.
- Conducting exploratory data analysis to identify trends, patterns, and outliers.
- Engineered automated data-cleaning pipelines for large-scale datasets, uncovering hidden trends in the pipeline that influenced quarterly strategy.

Berkeley Haas University of California, Kolkata — *Research Analyst*

June 2022 - Internship

- Provided tutorials on current data management techniques, including assisting with analysis and providing technical recommendations on study software.
- Advised on research software architecture and implemented advanced data management techniques, improving the efficiency of data collection tools for research.

Grace Ling Liang English School, Kolkata — *High School Diploma*

January 2010 - July 2020

ICSE: 87%

ISC: 89%

Bennett University, Greater Noida — *Bachelor in Technology, CSE (Data Science)*

October 2020 - July 2024

CGPA: 9.0

PROJECTS

IntervAI

- Architected an AI-driven recruitment tool using OpenAI that reduced manual screening time by simulating realistic interview environments.

Mask Detection Using AI

- Facial detection software checks whether a person is wearing a mask or not, using OpenCV, Matplotlib, and Python.

RiNAZ

- Raspberry Pi NAS online network storage platform for users to upload and store their files.
- The uploaded files are sorted automatically based on their file type.

Research Paper on Counterfeit Images and their Study (Working)

- Counterfeit images are a growing concern in the digital age, as advancements in technology have made it easier to create convincing fake images.
- In this research paper, the focus will be on exploring various techniques for detecting and authenticating counterfeit images, including machine learning algorithms and forensic analysis tools.

EXTRA-CURRICULAR ACTIVITIES

Event Manager, Geekforgeeks — *Bennett University*

- As events head at Geeks for Geeks, I have conducted various technical and non-technical events on a large scale.
- Worked in collaborations with start-ups and established multiple future growth contracts for the continued success of the chapter.

Project Management, Enactus — *Bennett University*

- As a part of the project management team in Enactus, I learned large-scale project implementation and managed big teams.

Events Core, Sunset Movie Club — *Bennett University*

- Being in the core team of the club, I learnt how to properly work in a team and deliver the work efficiently and timely.
